Assessment Requirements for TLIF5021 Apply rail safeworking rules and procedures

Release: 1

Assessment Requirements for TLIF5021 Apply rail safeworking rules and procedures

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- accessing and using rail safety industry standards, rules, codes of practice and operational procedures
- applying relevant safeworking systems and workplace procedures
- identifying job hazards and taking required action to minimise, control or eliminate identified hazards
- researching and reviewing relevant rail industry and rail safety regulation information.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- duty holders and their duties under rail safety and work health and safety (WHS)/occupational health and safety (OHS) legislation
- key concepts and definitions relating to rail safeworking
- key principles and practices associated with railway operations
- key regulatory requirements and rail industry standards for rail industry participants
- rail safety management systems (SMSs) and process
- rail safety operating principles
- rail safety regulatory framework
- relevant rail safety, WHS/OHS and environmental legislation related to safeworking and track protection.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include

requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in rail workplace operational situations or, where this is not available, in simulated workplace operational situations that replicate rail workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, rail industry standards, codes of practice and operation manuals.
