TLIJ3002 Apply quality systems

Release: 1

TLIJ3002 Apply quality systems

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to apply quality systems in workplace operations in accordance with relevant regulations and workplace quality standards within the transport and logistics industry.

It includes working within a quality improvement system and using quality improvement systems, tools and techniques in accordance with enterprise procedures.

Work is performed under some supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

J – Quality

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Work within a quality improvement system

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Instructions are followed and duties are performed either individually or as a member of a work team within a quality improvement system

1.2 Work is completed either individually or as a member of a work team in accordance with standards as defined in workplace policies and procedures

2 Use quality improvement systems, tools and techniques

- 2.1 Variations from required standards in the quality of services and/or products are detected and reported in accordance with workplace procedures
- 2.2 Quality of operations/service is monitored and adjusted as required to ensure internal and external customer satisfaction
- 2.3 Quality improvement tools and techniques are used individually and as part of a work team to systematically improve the quality of work, services and/or products

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIJ3002A Apply quality systems.

Assessment Requirements for TLIJ3002 Apply quality systems

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating effectively with others when applying and implementing quality systems
- completing relevant documentation
- identifying and using equipment, processes and procedures required within the context of the job concerned
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in relation to quality system standards and processes
- operating and adapting to differences in equipment in accordance with standard operating procedures
- operating electronic communications equipment to required protocol
- reading and interpreting relevant instructions, procedures and information
- reporting and/or rectifying identified problems, in accordance with regulatory requirements and workplace procedures
- selecting and using quality improvement tools and methods
- working collaboratively with others when applying and implementing quality systems
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- operational work systems, equipment or management, site and organisational operating procedures
- housekeeping standards and procedures
- impact of job on enterprise and individual performance
- quality improvement tools and methods
- typical quality-related problems that may arise in work operations and products, and related options for action and solutions
- workplace or site layout
- workplace quality assurance and improvement principles and procedures.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.
