Assessment Requirements for TLIL0006 Assist with rail traffic operations

Release: 1

Assessment Requirements for TLIL0006 Assist with rail traffic operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- assisting with rail traffic preparations and rail traffic operations when:
 - loading and/or unloading
 - taking charge of or handing over and/or stabling rail traffic
- communicating and working effectively with others
- completing relevant documentation
- identifying job hazards and taking required actions to minimise, control or eliminate identified hazards
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- operating and adapting to differences in equipment in accordance with operating procedures
- reading and interpreting relevant instructions, workplace procedures and information
- selecting and using relevant equipment and materials
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- applicable rail safety requirements, workplace procedures, relevant codes of practice and/or guidelines
- appropriate rail traffic systems
- documentation requirements
- emergency procedures including emergency response plan
- environmental protection legislation, regulations, codes of practice, policies and procedures
- problems that can occur when assisting with rail traffic operations and actions that should be

taken

- procedures for fixed and hand signalling, and communications protocols
- stabling rail traffic workplace procedures
- system of safeworking and requirements
- visual inspections including:
 - air leakage
 - consumables including fuel, oil and water
 - couplings for signs of wear or damage
 - flexible connections and fittings for signs of wear or damage
 - rail traffic equipment and, if applicable, end of rail traffic monitoring device
 - rail traffic defects
 - wheels and braking equipment for signs of wear or damage.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate rail corridor workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.
