Assessment Requirements for TLIL0027 Ensure competency of rail safety workers

Release: 1

Assessment Requirements for TLIL0027 Ensure competency of rail safety workers

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least three separate occasions and work groups and include:

- applying relevant legislation and rail transport operator procedures
- checking rail safety worker competency system including checking the rail safety worker compliance
- communicating effectively and working collaboratively with others
- communicating with workers to identify their own rail safety worker competency
- mapping activities and taking appropriate actions to manage implementing rail transport operator rail safety worker competency
- reporting of compliance or breaches of rail safety worker competence in accordance with rail transport operator procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- components of a rail safety worker competency system
- procedures and tools for monitoring and reviewing organisation's rail safety worker competency system and related policies and procedures, and for reporting outcomes
- processes and resources for checking worker competence
- rail safety worker competence, regulations and rail transport operator policies
- relevant rail safety legislation, regulations, permit and licence requirements related to rail safety worker competency
- sources of information on rail safety worker competence
- task analysis methodologies for rail safety worker competence.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including rail safety legislation, workplace procedures, regulations, codes of practice and operation manuals.
