Assessment Requirements for TLIL2041 Monitor and record rolling stock locations

Release: 2

Assessment Requirements for TLIL2041 Monitor and record rolling stock locations

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant workplace procedures
- completing relevant documentation
- documenting and recording rolling stock locations
- gathering information on train movements
- identifying job hazards and taking required action to minimise, control or eliminate identified hazards
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with operating procedures
- operating rolling stock management system and/or computer programs to track rolling stock movements
- reading and interpreting relevant instructions, procedures, information and signs
- reporting and/or rectifying problems, faults or malfunctions in accordance with workplace procedures
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- applicable state/territory legislated rail safety requirements, relevant codes of practice and/or guidelines
- emergency procedures
- management systems and/or computer programs for rolling stock tracking
- problems that may occur when monitoring and recording rolling stock locations and related actions that should be taken
- relevant documentation requirements
- relevant rail danger zones
- relevant workplace procedures for monitoring and recording rolling stock locations
- safeworking systems and requirements
- type, specifications, capacity, characteristics and features of rolling stock
- workplace hazards that may exist when monitoring and recording rolling stock locations and ways in which the risks involved may be eliminated or controlled.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations or, where this is not available, in simulated workplace operational situations that replicate rail corridor workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals.
