Assessment Requirements for TLIL2048 Prepare for train departure

Release: 2

Assessment Requirements for TLIL2048 Prepare for train departure

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment in accordance with operating procedures
- assessing stock levels and completing documentation
- checking equipment and related documentation
- checking for planned variations from normal routines
- checking passenger facilities
- checking rolling stock
- communicating effectively with others
- identifying job hazards and taking required action to minimise, control or eliminate identified hazards
- identifying, selecting and using relevant equipment and materials
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- reading and interpreting relevant instructions, procedures and information
- reporting and/or rectifying problems, faults or malfunctions promptly in accordance with regulatory requirements and workplace procedures
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- applicable state/territory legislated rail safety requirements, relevant codes of practice and/or

guidelines

- essential equipment, supplies and materials required for trip
- how to identify possible fault or defects that may occur with rolling stock and equipment
- normal level of use of consumable items such as food and beverages on passenger trains
- passenger train customer service and cleanliness standards
- position and number of fire extinguishers on passenger trains
- problems that may occur when preparing a train for departure, and actions that should be taken to resolve these problems
- relevant documentation requirements
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental procedures and regulations, including codes of practice and/or guidelines
- rolling stock and car sequence, and relevant labelling requirements
- rolling stock and equipment checks
- structure of the train consist
- types of rolling stock and/or passenger cars and their features
- workplace procedures for preparing a train for departure, including for passenger train operation
- workplace procedures for reporting identified rolling stock and equipment defects.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations or, where this is not available, in simulated workplace operational situations that replicate rail corridor workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including workplace procedures, regulations, rail industry standards, codes of practice and operation manuals.
