Assessment Requirements for TLIL3039 Assist with train operations

Release: 1

Assessment Requirements for TLIL3039 Assist with train operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria on at least one occasion and include:

- applying relevant rail safety and workplace procedures
- assisting driver in monitoring train performance and as required, security of load
- assisting in stabling and securing train
- assisting with preparing trains prior to operation
- communicating effectively with others when assisting with train operations
- conducting handover and stabling activities correctly
- documenting train journey and incidents
- identifying job hazards and taking required action to minimise, control or eliminate identified hazards
- identifying possible faults and defects that could occur and appropriate responses
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and anticipating operational hazards and taking appropriate action
- monitoring journey schedule
- monitoring the operation of different train types in normal operation in accordance with workplace procedures
- operating and adapting to differences in equipment in accordance with operating procedures
- reading and interpreting relevant instructions, procedures and information
- reporting and/or rectifying problems, faults or malfunctions, in accordance workplace procedures
- selecting and using relevant equipment and materials when assisting with train operations
- working collaboratively with others when assisting with train operations
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and include knowledge of:

- applicable state/territory legislated rail safety requirements, codes of practice and/or guidelines
- documentation required during and after train operations
- electronic communications equipment protocols
- emergency procedures
- motive power unit and rolling stock systems
- problems that can occur when assisting with train operations and action that should be taken
- procedures for assisting a driver in monitoring train operations and performance
- procedures for completing required documentation
- procedures for coupling/uncoupling motive power units and rolling stock
- procedures for fixed and hand signalling and voice communication
- procedures for identifying equipment defects and assessing for appropriate action
- relevant rail danger zones
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental procedures
- relevant safeworking systems and requirements
- relevant train operations, procedures and operating requirements
- track or road characteristics
- train characteristics.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations or, where this is not available, in simulated workplace operational situations that replicate rail corridor workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations

- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.
