Assessment Requirements for TLIL3065 Implement a track occupancy authority

Release: 1

Assessment Requirements for TLIL3065 Implement a track occupancy authority

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant workplace safeworking system rules and procedures
- communicating effectively with individuals and work groups
- completing Track Occupancy Authority (TOA) documentation
- complying with the application requirements for a TOA
- following workplace policies, procedures and protocols
- identifying job hazards, unsafe situations and emergencies and taking required action to minimise, control or eliminate identified hazards.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- operational communications protocols and systems
- Rail Infrastructure Manager policies, procedures, rules and protocols for identified unsafe situations or emergencies
- Rail Infrastructure Manager safeworking system rules and procedures
- rail terminology as defined by the relevant Rail Infrastructure Manager
- types of track protection and track occupancy safeworking systems
- worksite protection plan.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations or, where this is not available, in simulated workplace operational situations that replicate rail corridor workplace conditions

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation and terminology as defined by the relevant Rail Infrastructure Manager safeworking system including workplace procedures, regulations, rules and codes of practice.
