Assessment Requirements for TLIL3082 Implement absolute signal blocking

Release: 2

Assessment Requirements for TLIL3082 Implement absolute signal blocking

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant system of safeworking, workplace rules and procedures
- communicating effectively with individuals and work groups
- completing absolute signal blocking (ASB) documentation
- explaining and implementing site safety plan
- explaining how to end the use of ASB protection
- following Rail Infrastructure Manager workplace policies, rules, procedures and protocols
- identifying job hazards and taking required action to minimise, control or eliminate identified hazards
- identifying unsafe situations and emergencies
- recognising the difference between permissive and absolute signals
- requesting ASB protection from Network Control Officer.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- operational communication protocols and systems
- Rail Infrastructure Manager policies, procedures and protocols for identified unsafe situations or emergencies within workplace role
- Rail Infrastructure Manager rules and system of safeworking procedures to implement ASB
- rail terminology as defined by the applicable Rail Infrastructure Manager
- relevant rail danger zones
- site safety plan
- worksite protection plan.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate rail workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation with terminology as defined by the relevant Rail Infrastructure Manager systems of safeworking including workplace procedures, regulations, rules and codes of practice.
