Assessment Requirements for TLIL3083 Implement a track work authority and manage rail traffic through worksites

Release: 2

Assessment Requirements for TLIL3083 Implement a track work authority and manage rail traffic through worksites

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Performance Evidence
- Minor statement changes in Knowledge Evidence
- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- allocating attention according to track work authority (TWA) priorities
- applying relevant systems of safeworking and workplace procedures for a TWA
- communicating factual information to create confidence and trust with individuals and work groups
- conducting a pre-start briefing for work group supervisor
- coordinating protection as rail traffic through worksites
- determining and setting out protection
- explaining how to manage unsafe situations and emergencies
- following workplace policies, rules, procedures and protocols
- identifying appropriate resources for worksite protection
- identifying job hazards and taking required action to minimise, control or eliminate identified hazards
- identifying, responding to and/or reporting unsafe situations and emergencies
- managing rail traffic through worksites
- operating electronic communications equipment to required protocol
- placing worksite protection
- reading and interpreting responsibilities for worksite protection from the worksite safety plan.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria include knowledge of:

- equipment available for worksite protection
- hand, light and flag signals and signs used by day or night
- operational communication protocols and systems
- positioning requirements for handsignallers
- Rail Infrastructure Manager systems of safeworking, policies, procedures, rules and protocols for identified unsafe situations or emergencies within workplace role
- Rail Infrastructure Manager rules and procedures
- rail terminology as defined by the relevant Rail Infrastructure Manager system
- relevant rail danger zones
- relevant workplace systems of safeworking, rules and procedures
- TWA as defined by the relevant Rail Infrastructure Manager systems of safeworking
- worksite protection plans.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate rail corridor workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation and terminology as defined by the relevant Rail Infrastructure Manager system of safeworking including workplace procedures, regulations, rules and codes of practice.
