Assessment Requirements for TLIL4030 Control a furniture warehouse

Release: 1

Assessment Requirements for TLIL4030 Control a furniture warehouse

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing relevant documentation
- interpreting and following operational instructions and prioritising work
- modifying activities dependant on workplace contexts, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with operating procedures
- operating electronic communications equipment to required protocol
- planning own work, predicting consequences and identifying improvements
- providing leadership and working collaboratively with others
- reading, interpreting and following relevant instructions, procedures, information and signs
- selecting and using relevant communications, computing and office equipment
- using inventory information to determine, plan and organise the control of a furniture warehouse
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian codes and regulations/permit/licence requirements relevant to workplace activities
- documentation requirements, including reports and records related to damaged furniture and effects, emergencies and security breaches
- equipment applications, capacities, configurations, safety hazards and control mechanisms
- information on various categories or groups of furniture and effects including their key characteristics and hazards, and the special handling, stacking and storage requirements for each
- operational work systems, equipment, management and site operating systems
- problems that may occur and appropriate action that can be taken
- site layout
- types of storage areas and related equipment appropriate for different types of furniture and effects
- workplace procedures and policies relevant for controlling a furniture warehouse.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.
