Assessment Requirements for TLIL4077 Develop out-of-course rail traffic plans and schedules

Release: 2

Assessment Requirements for TLIL4077 Develop out-of-course rail traffic plans and schedules

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Performance Evidence
- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- analysing service and/or operational needs to establish changes to rail traffic requirements
- applying relevant safeworking systems and workplace procedures
- communicating altered or additional rail traffic movement requirements
- communicating and negotiating effectively with customers and others
- completing relevant documentation and entering data
- developing out-of-course rail traffic plan and schedule
- identifying hazards from out-of-course rail traffic plan and taking required actions to minimise, control or eliminate identified hazards
- interpreting and following operational instructions and prioritising work
- interpreting train control graphs and diagrams
- reading and interpreting relevant instructions, procedures and information
- rectifying issues or problems that may occur promptly in accordance with regulatory requirements and workplace procedures
- working collaboratively with others.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- applicable state/territory legislated rail safety requirements, relevant codes of practice and/or guidelines for developing out-of-course rail traffic plans and schedules
- details of approved rail traffic on the network
- issues or problems that can occur when developing rail traffic plans and schedules and how

they may be addressed

- rail traffic services provided by the organisation
- relevant documentation requirements and procedures
- relevant network interface agreements
- safeworking systems requirements
- timetable principles
- workplace procedures for developing rail traffic plans and schedules.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations or, where this is not available, in simulated workplace operational situations that replicate rail corridor workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including workplace procedures, regulations, rail industry standards, codes of practice and operation manuals.
