Assessment Requirements for TLIL4082 Coordinate rail interface agreements

Release: 1

Assessment Requirements for TLIL4082 Coordinate rail interface agreements

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating effectively with others
- conducting audits of an organisation's rail interface agreements
- developing rail interface agreement documentation
- identifying an organisation's rail interface agreement requirements
- negotiating effectively
- reading and interpreting rail interface agreement legislation documentation
- reviewing a rail interface agreement
- working collaboratively with employees and management.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- components of a rail interface system
- procedures for auditing an organisation's rail interface agreements and reporting audit outcomes
- relevant legislation and regulations relating to rail interfaces
- responsibilities of an organisation and employees for implementing rail interface agreements.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include

requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations or, where this is not available, in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.
