Assessment Requirements for TLIL5072 Manage rail yard operations

Release: 1

Assessment Requirements for TLIL5072 Manage rail yard operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- accessing and using rail industry standards
- applying relevant safeworking and workplace procedures
- communicating effectively with others, particularly in relation to interpreting complex information relating to rail yard operations
- identifying job hazards and taking required action to minimise, control or eliminate identified hazards
- implementing rail yard emergency procedures
- incorporating rail yard safety requirements into the organisational safety management system (SMS)
- managing rail yard resourcing requirements
- optimising rail yard operations
- preparing to manage rail yard operations
- researching information related to the rail industry and rail yard operations
- reviewing regulatory information changes.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- key principles and practices associated with rail yard operations
- key rail industry regulatory requirements and standards
- rail industry terminology, including terminology used in rail industry standards and codes of practice
- rail regulatory framework
- relevant rail yard operation information
- relevant rail safety management system (SMS), work health and safety

(WHS)/occupational health and safety (OHS) and environmental legislation related to rail yard operations

- safety management system
- safeworking systems used within rail yard operations
- types of vehicles within rail yards.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in rail yard workplace operational situations or, where this is not available, in simulated workplace operational situations that replicate rail workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, rail industry standards, codes of practice and operation manuals.
