**Assessment Requirements for TLIO5020
Advise on and manage security and safety
in international freight transport**

Release: 2

Assessment Requirements for TLIO5020 Advise on and manage security and safety in international freight transport

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- assessing international freight transport security and safety risks
- completing documentation and records related to planning and managing international freight transport security and safety
- implementing contingency plans including when there is a breach of security and safety procedures
- implementing transport security and safety plans and policies
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and reviewing security and safety system performance
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- specifying international transport security and safety requirements.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- applicable legislation and regulations:
 - Australian and international regulations, conventions and codes of practice for the safe and secure international transport of freight
 - Australian and international standards and certification requirements
 - relevant Australian and international environmental protection legislation
 - relevant Australian and international transport security and safety legislation
 - relevant regulations for importing and exporting cargo
 - relevant regulations for international trading and financial transactions

- business policies for security provision, including outsourcing components of operations and engaging additional resources
- definition of safety in the context of an international freight transport supply chain
- importance of security and safety in the international transport supply chain
- insurance assessments
- international and Australian transport security initiatives and regulations related to importing, exporting and transiting goods, including aviation and maritime security
- licence and permit requirements relevant to international freight transport security and safety procedures
- problems that may occur when planning and managing international freight transport security and safety, and action that can be taken to prevent or to resolve these problems
- procedures for planning and managing international freight transport security and safety
- regulations, conventions, codes of practice and legislative requirements relevant to planning and managing international freight transport security and safety procedures within a freight forwarder's workplace and in other organisations in the international freight transport supply chain
- relevant information and documentation
- relevant international and Australian Standards and certification requirements
- security and safety risks
- security services provision
- sources of information on security and safety in international freight transport.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or simulations
- relevant materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals.
