Assessment Requirements for TLIP4039 Monitor transport operations

Release: 1

Assessment Requirements for TLIP4039 Monitor transport operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- advising on recommendations about possible transport operations improvements
- analysing transport cost elements, pricing and operating costs
- communicating and working effectively with others
- completing relevant documentation
- conveying non-compliance issues
- developing own competence in response to changes in activities
- identifying and correctly using relevant equipment
- interpreting and applying relevant regulations and instructions
- modifying activities dependent on workplace contingencies, situations and environments
- monitoring and anticipating operational problems, hazards and risks, including security breaches, and taking appropriate action
- monitoring work activities in terms of planned schedule
- reading, interpreting and following relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- reporting security breaches.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and include knowledge of:

- organisational policies and procedures, including those relating to effective monitoring and reporting of transport operations
- principles of load building, to enable effective and efficient movement of load
- relevant sections of national and state/territory legislation, regulatory requirements, codes

- of practice and/or guidelines as they relate to the level and type of transport operations
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental procedures and guidelines
 - software applications commonly used to assist in transport, route planning and load building to maximise cost efficiency.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.
