Assessment Requirements for TLIS2033 Install and repair temporary track supports

Release: 2

Assessment Requirements for TLIS2033 Install and repair temporary track supports

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant workplace procedures
- checking compliance of work with job specifications
- completing relevant documentation
- determining job requirements
- following operational instructions and work sequences
- identifying job hazards and taking required actions to minimise, control or eliminate identified hazards
- installing and/or repairing a range of temporary supports
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- organising plant, materials and equipment for scope of the track support job
- planning work requirements in accordance with workplace procedures
- preparing and installing temporary supports
- reading and interpreting relevant plans, specifications, instructions and manuals
- reporting and/or rectifying identified problems, faults or malfunctions, in accordance with workplace procedures
- selecting and using relevant equipment and tools in accordance with workplace procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- emergency management plan
- hazards that may exist when installing and repairing temporary track supports, and ways of controlling the risks involved

- problems that may occur when installing and repairing temporary track supports, and actions that can be taken to report or resolve these problems
- relevant rail industry standards
- relevant recording and documentation procedures
- relevant rail safety, work health and safety (WHS)/occupational health and safety (OHS) and environmental procedures and regulations
- track support equipment and material specification, and compliance with workplace safeworking procedures
- workplace procedures for installing and repairing temporary track supports.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations or, where this is not available, in simulated workplace operational situations that replicate rail corridor workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including workplace procedures, regulations, rail industry standards, codes of practice and operation manuals.
