TLISS00093 Integrated Logistics Support Inventory Controller Skill Set

Release 2

TLISS00093 Integrated Logistics Support Inventory Controller Skill Set

Modification History

Release 2: This is the second release of this Skill Set with unit codes updated.

Release 1. New Skill Set.

This Skill Set replaces and is equivalent to the TLISS00020 Integrated Logistics Support Inventory Controller Skill Set.

Description

This Skill Set is for individuals who have functional responsibility for the control of inventory and includes defining stockholding policy, usage rates, demand management, performance management and disposal.

Pathways Information

The TLISS00093 Integrated Logistics Support Inventory Controller Skill Set is part of the TLI Transport and Logistics Training Package.

Licensing/Regulatory Information

Candidates should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

Skill Set Requirements

A total of **7 units** of competency must be attained.

PSPGEN025	Develop and implement work unit plans
PSPPCM001	Carry out basic procurement
TLIP5036	Manage assets
TLIR0003	Monitor supplier performance
TLIX4028	Apply knowledge of logistics
TLIX4030	Apply knowledge of materiel sustainment

TLIX4035 Maintain technical data and information

Target Group

People interested in a practitioner role, generally in the acquisition phase of the materiel life cycle. This role involves establishing the inventory management supply chain for the in-service phase of the materiel life cycle and strongly aligns with the roles of logistic inventory controllers.

Suggested words for Statement of Attainment

This TLISS00093 Integrated Logistics Support Inventory Controller Skill Set from the TLI Transport and Logistics Training Package meets the industry requirements for individuals who control line items or fleets within a supply system in an acquisition environment.
