TLISS00240 Materiel Logistics Inventory Controller Skill Set

Release 1

TLISS00240 Materiel Logistics Inventory Controller Skill Set

Modification History

Release 1: This is the first release of this Skill Set in the TLI Transport and Logistics Training Package.

This Skill Set replaces but is not equivalent to TLISS00093 Integrated Logistics Support Inventory Controller Skill Set.

This Skill Set replaces but is not equivalent to TLISS00098 Logistics Inventory Controller Skill Set.

Description

This Skill Set is for individuals who have functional responsibility for the control of inventory and includes defining stockholding policy, usage rates, demand management, performance management and disposal.

Pathways Information

The TLISS00240 Materiel Logistics Inventory Controller Skill Set is part of the TLI Transport and Logistics Training Package and is a pathway to the Certificate IV in Materiel Logistics.

Licensing/Regulatory Information

Candidates should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

Skill Set Requirements

A total of **7 units** of competency must be attained.

PSPPCM028	Carry out basic procurement
TLIR0003	Monitor supplier performance
TLIX0049	Apply knowledge of materiel logistics
TLIX0051	Apply materiel logistics processes and procedures
TLIX0054	Assess maintenance spares and manage repairable items
TLIX0064	Implement and monitor materiel logistics plans

TLIX0065 Maintain technical data and information

Target Group

This Skill Set is for people interested in a practitioner role, generally in the acquisition phase of the materiel life cycle. This role involves establishing the inventory management supply chain for the in-service phase of the materiel life cycle and strongly aligns with the roles of Logistic Inventory Controller.

Suggested words for Statement of Attainment

This TLISS00240 Materiel Logistics Inventory Controller Skill Set from the TLI Transport and Logistics Training Package meets the industry requirements for individuals who control line items or fleets within a supply system in an acquisition environment.
