Assessment Requirements for TLIU1013 Prepare for environmentally sustainable work practices

Release: 1

Assessment Requirements for TLIU1013 Prepare for environmentally sustainable work practices

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- complying with work health and safety (WHS)/occupational health and safety (OHS) standards
- identifying reasons for environmentally sustainable work practices
- identifying transport and logistics environmentally sustainable work practices
- reading and interpreting work requirements or safety data sheets (SDSs)/material safety data sheets (MSDSs).

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

environmental issues relating to:

- life cycle of products: re-new, re-use and recycle
- workplace/site
- service requirements for transport and logistics, including:
 - company requirements and structure
 - legislation, regulations and codes of practice applicable to specific transport and logistics functions
 - selecting, operating, cleaning and maintaining equipment
 - resource efficiency processes
 - transport and logistics environmental options and best practices
 - supply chain procedures
 - relevant enterprise policies, procedures and protocols
 - duty of care
- sustainability management principles, practices, tools and techniques relevant to transport and logistics, such as:

- correct use of equipment according to environmental protection regulations and guidelines
- techniques for minimising fuel/materials consumption
- WHS/OHS requirements relating to the WHS/OHS hierarchy of control.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment, and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.
