Assessment Requirements for TLIU3015 Identify wastes and hazards in the waste management industry

Release: 1

Assessment Requirements for TLIU3015 Identify wastes and hazards in the waste management industry

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- communicating effectively verbally and in writing
- conducting work practices safely and efficiently by observing work health and safety (WHS)/occupational health and safety (OHS) requirements
- documenting and keeping records
- identifying a range of potential hazards present in the workplace and assessing risk
- identifying a range of waste streams, hazardous wastes and waste contaminants
- identifying waste types and waste non-conformances
- listing potential hazards and risks
- reading and interpreting:
 - emergency requirements
 - hazard advice
 - job sheets
- work requirements and safety data sheets (SDSs)/material safety data sheets (MSDSs)
- segregating valuable resources in composite materials
- segregating waste types, including potentially hazardous waste.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- emergency response procedures relating to:
 - coding systems
 - working in confined space
 - duty of care
 - environmental agencies
 - identification of work areas, including location of:
 - alarms
 - communications equipment
 - emergency equipment
 - reporting requirements
 - signalling techniques
 - state/territory environmental regulations
 - waste containment methods and isolation of emergencies
 - waste management hierarchy
- identification of waste:
 - contaminants
 - disposal and recovery routes
 - management options
 - monitoring procedures
 - non-conformances
 - non-conformance handling procedures
 - storage requirements
 - types
- potential hazards and risks relating to:
 - dangerous goods
 - potential incidents
- procedures for containing segregated waste types, including containment and isolation of hazardous waste
- WHS/ OHS requirements relating to:
 - chemical storage and decanting
 - dangerous goods and hazardous substances
 - first aid appropriate for likely hazards and risks in work environment
 - hierarchy of risk control.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of

assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.
