Assessment Requirements for TLIW2038

Place and remove temporary speed restriction equipment

Release: 3

Assessment Requirements for TLIW2038 Place and remove temporary speed restriction equipment

Modification History

Release 3. This is the third release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Application
- Minor statement changes in Performance Evidence
- Minor statement changes in Knowledge Evidence.

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor Element word contraction
- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant system of safeworking and workplace procedures in a suitable rail corridor context
- communicating effectively with individuals and groups
- identifying job hazards and taking required actions to minimise, control or eliminate identified hazards
- reading and interpreting Rail Infrastructure Manager procedures for placing and removing temporary speed restriction (TSR) equipment
- using TSR equipment in accordance with required Rail Infrastructure Manager standards and system of safeworking
- working within the available timeframes for the work function and in accordance with workplace safeworking procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Rail Infrastructure Manager workplace procedures for placing and removing TSR equipment
- relevant rail danger zones
- terminology as defined by the relevant Rail Infrastructure Manager system of safeworking.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations or, where this is not available, in simulated workplace operational situations that replicate rail corridor workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant TSR exercises, case studies and/or simulations
- applicable documentation and terminology as defined by the relevant Rail Infrastructure Manager system of safeworking including workplace procedures, regulations, rail network standards, rules and codes of practice.
