Assessment Requirements for TLIX0008 Comply with biosecurity border clearance

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- assessing documents with required attention to detail
- assessing documents, answering lodgement questions and determining appropriate concern types and automatic entry process (AEP) codes
- assessing whether documents are compliant with the requirements of the purpose for which they are to be used
- ensuring currency of relevant legislative and regulatory knowledge
- maintaining records in accordance with regulatory requirements
- reading and interpreting relevant Acts and legislation.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- general awareness of biosecurity border clearance requirements
- obligations of person engaged in a regulatory arrangement
- policies regarding compliance with requirements of a regulatory arrangement
- relevant legislation, regulations, schemes, policies and procedures.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy

requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or simulations
- relevant materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals.
