Assessment Requirements for TLIX0030X Evaluate LORA in a defence integrated logistics environment

Release: 1

Assessment Requirements for TLIX0030X Evaluate LORA in a defence integrated logistics environment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least two separate occasions and include:

- documenting level of repair analysis (LORA)
- evaluating LORA in a defence integrated logistics environment
- identifying and consulting with relevant stakeholders
- identifying source data
- identifying, interpreting and applying legislation, policies and procedures that may impact on supply support
- identifying, obtaining and interpreting documentation
- revising logistic support analysis (LSA) data
- working collaboratively with internal/external personnel/stakeholders to achieve required supply support outcomes.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- factors to be considered in integrated logistics support (ILS) planning and management
- legislation and industry standards relevant to ILS
- data requirements and sources to inform LORA
- use of in-service data to inform LORA
- economic and non-economic analysis and performance measurement
- LSA plan
- LORA in a defence integrated logistics environment
- organisational policies and procedures relevant to ILS, LSA and LORA
- legislation and industry standards relevant to ILS, LSA and LORA.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include

requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include access to:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation, including organisational policies and procedures, legislation, data and/or modelling applicable to ILS, industry standards and/or specifications and access to relevant organisational information management systems
- relevant materials, tools, equipment and personal protective equipment (PPE) currently used in industry.
