Assessment Requirements for TLIX0049

Apply knowledge of materiel logistics

Release: 1

Assessment Requirements for TLIX0049 Apply knowledge of materiel logistics

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- adhering to relevant integrated logistics support requirements
- adhering to relevant materiel sustainment requirements
- analysing and interpreting materiel logistics information to determine where internal and external factors impact on integrated logistics requirements, and adjusting planning accordingly
- applying materiel logistics knowledge to assist work being performed and to guide problem solving
- consulting and negotiating with internal and external stakeholders and resolving potential areas of conflict or concern to ensure overall objectives are achieved
- focusing on clear communication of key materiel logistics information, presenting information accurately and selecting appropriate medium for communication to a range of audiences
- identifying relationships between organisational goals and recognising how own work contributes to achieving these goals
- incorporating feedback and analysis of information to overcome challenges or setbacks
- using appropriate information technology and software.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- contract management relevant to materiel logistics
- integrated logistics support
- materiel life cycle
- materiel logistics knowledge relevant to materiel and materiel systems
- materiel logistics knowledge relevant to the work performed
- materiel sustainment
- organisational policy and procedures
- organisational role relevant to materiel logistics

- own role in relation to wider organisational or project context
- safety, legislative and statutory requirements, including relevant environmental and sustainability issues.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.
