Assessment Requirements for TLIX0051

Apply materiel logistics processes and procedures

Release: 1

Assessment Requirements for TLIX0051 Apply materiel logistics processes and procedures

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- adhering to and applying relevant data collection, storage and retrieval requirements
- applying relevant materiel logistics knowledge to work and to guide problem solving
- identifying relationships between organisational goals and recognising how own work contributes to achieving these goals
- incorporating feedback and analysis of information to overcome challenges or setbacks
- operating and using relevant equipment and systems.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of:

- integrated logistics support
- logistics data collection and storage requirements
- logistics data retrieval procedures
- level of written communication required to prepare letters and reports
- materiel life cycle
- organisational role relevant to materiel logistics
- safety, legislative and statutory requirements, including relevant environmental and sustainability issues
- materiel logistics administrative procedures
- materiel sustainment.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the

time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.
