Assessment Requirements for TLIX0055 Conduct configuration management

Release: 1

Assessment Requirements for TLIX0055 Conduct configuration management

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- adhering to and applying relevant data and information management processes
- adhering to and applying relevant data collection, storage and retrieval requirements
- analysing data and information
- applying relevant configuration management and project management knowledge to work being performed and to guide problem solving
- identifying relationships between organisational goals and recognising how own work contributes to achieving these goals
- identifying, reviewing and analysing information that may impact on configuration management program, or may be impacted by configuration management program
- incorporating feedback and analysis of information to overcome challenges or setbacks
- managing time and prioritising work to ensure objectives are met in accordance with schedule
- negotiating and communicating effectively with key internal and external stakeholders and resolving potential areas of conflict or concern to ensure overall configuration management objectives are achieved
- operating equipment and systems relevant to configuration management activities
- undertaking performance measurement relevant to configuration management to enable objectives to be measured against defined parameters
- using appropriate information management systems
- using organisational strategic objectives to identify and assess potential alliances and effective strategies.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- cataloguing and codification
- configuration management data collection and storage requirements
- configuration management data retrieval procedures

- configuration management processes and administrative procedures
- level of written and oral communication required to prepare correspondence and reports
- materiel life cycle
- organisational policy and procedures related to configuration management
- organisational role relevant to configuration management
- product knowledge related to systems and equipment in service in the organisation
- safety, legislative and statutory requirements, including relevant environmental and sustainability issues
- technical regulatory framework.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.
