Assessment Requirements for TLIX0056 Conduct logistics support analysis activities

Release: 1

Assessment Requirements for TLIX0056 Conduct logistics support analysis activities

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- adhering to and applying relevant data and information management processes
- analysing data and information
- applying relevant logistics support analysis, integrated logistics support and project management knowledge to assist in work and to guide problem solving
- consulting and negotiating with internal and external stakeholders, and resolving potential areas of conflict or concern to ensure overall objectives are achieved
- identifying relationships between organisational goals and recognising how own work contributes to achieving these goals
- identifying, reviewing and analysing relevant information that may impact on logistics support analysis activities or may be impacted by logistics support analysis activities
- incorporating feedback and analysis of information to overcome challenges or setbacks
- managing time and prioritising work to ensure objectives are met in accordance with required schedule
- undertaking performance measurement to enable objectives to be measured against defined parameters
- using appropriate information management systems
- using materiel logistics program strategic objectives to identify long-term factors and external considerations for conducting logistics support analysis activities.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- integrated logistics support processes
- level of written and oral communication required to prepare correspondence and reports
- logistics support analysis processes
- organisational policy and procedures related to logistics support analysis, including environmental and sustainability issues
- organisational role relevant to logistics support analysis

- product knowledge related to systems and equipment in service in the organisation
- consideration of reliability, availability and maintainability factors
- safety, legislative and statutory requirements, including relevant environmental and sustainability issues.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.
