Assessment Requirements for TLIX0062 Establish supply chains

Release: 1

Assessment Requirements for TLIX0062 Establish supply chains

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- adhering to relevant work health and safety (WHS)/occupational health and safety (OHS) requirements
- analysing and evaluating information, and determining how it may be impacted by the supply chain or how the supply chain might be impacted by the information being considered
- analysing supply chain requirements
- applying industry knowledge of operations, trends and drivers to establishing supply chains
- applying logistics and project management knowledge when establishing supply chains
- communicating with stakeholders
- consulting and negotiating with internal and external stakeholders and resolving potential areas of conflict or concern to ensure overall objectives are achieved
- identifying relationships between organisational goals and recognising how own work contributes to achieving these goals
- identifying relevant information from integrated logistics support program and materiel sustainment program that is relevant to establishing supply chains
- identifying requirements for plans and adjusting them as necessary to ensure effective and efficient performance
- incorporating feedback and analysis of information to overcome challenges or setbacks
- initiating and efficiently monitoring processes
- initiating remedial action required
- preparing and providing relevant reports and documentation
- undertaking performance measurement to enable objectives to be measured against defined parameters
- using organisational strategic objectives to identify long-term factors and external considerations for establishing a supply chain.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of:

- codification and cataloguing processes
- industrial base capability

- integrated logistics support
- key international agreements relating to supply chains
- concept of interoperability in supply chains
- legislative and regulatory environment, including relevant environmental and sustainability issues
- logistics governance
- logistics support analysis principles and processes
- materiel sustainment
- organisational policy and procedures
- organisational role relevant to supply chains
- performance measurement
- planning processes relating to supply chains
- product knowledge related to systems and/or equipment in service in the organisation
- safety, legislative and statutory requirements, including relevant environmental and sustainability issues
- supply chain concepts.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.
