Assessment Requirements for TLIX0064 Implement and monitor materiel logistics plans

Release: 1

Assessment Requirements for TLIX0064 Implement and monitor materiel logistics plans

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- analysing data and information
- applying material logistics and project management knowledge
- applying materiel logistics knowledge to assist in work and to guide problem solving
- applying relevant implementation processes
- consulting and negotiating with internal and external stakeholders, and resolving potential areas of conflict or concern to ensure overall objectives are achieved
- developing and complying with procedures to implement and monitor material logistics plans
- ensuring mechanisms are in place to monitor materiel logistics plans
- identifying relationships between organisational goals and recognising how own work contributes to achieving these goals
- incorporating feedback and analysis of information to overcome challenges or setbacks
- monitoring and reporting on implementation processes
- undertaking performance measurement to enable objectives to be measured against defined parameters
- using organisational strategic objectives to identify long-term factors and external considerations for implementing materiel logistics planning.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of:

- codification and cataloguing processes
- configuration management
- contract management relevant to materiel logistic planning
- integrated logistics support processes related to planning
- key international agreements relevant to materiel logistic planning
- concept of interoperability relevant to materiel logistic planning
- level of written communication required to prepare correspondence and reports
- logistics support analysis principles and processes

- materiel sustainment processer related to planning
- organisational policy and procedures impacting on materiel logistics
- organisational role relevant to materiel logistics
- performance measurement
- product knowledge related to systems and/or equipment in service in the organisation
- safety, legislative and statutory requirements, including environmental and sustainability issues
- supply chain concepts
- technical regulatory framework.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.
