Assessment Requirements for TLIX0073 Organise supply support on deployment

Release: 1

Assessment Requirements for TLIX0073 Organise supply support on deployment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- analysing and validating information accurately
- analysing task complexities such as limitations, freedoms, vulnerabilities, time limitations
- applying a broad range of problem-solving strategies
- applying supply support knowledge
- identifying potential solutions to problems or challenges to progress operations
- interpreting instructions and applying information to actions and tasks
- interpreting policies and procedures
- making decisive, informed decisions that align with organisational requirements
- managing own planning tasks in accordance with organisational requirements
- managing stock levels and storage
- preparing and issuing instructions that clearly communicate intent and operational tasks
- using appropriate information technology and software.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- disposal processes
- environmental considerations for providing supply support
- financial delegation limits
- implementation of logistics information systems processes
- logistics support analysis principles and processes
- logistics support concepts
- organisation, its function and logistics support capabilities
- organisational policy and procedures relevant to supply
- organisational role relevant to specialist logistics support
- organisational writing conventions
- planning and sustainment processes

- salvage, return and recycling processes for reducing waste
- warehousing procedures for hazardous stocks, segregation, dispersion requirements and stock compatibility
- warehousing procedures for receipts and issues
- work, health and safety (WHS)/occupational health and safety (OHS) requirements.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.
