Assessment Requirements for TLIX0074 Organise the deployment and delivery of logistics support

Release: 1

Assessment Requirements for TLIX0074 Organise the deployment and delivery of logistics support

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- analysing and validating numerical information accurately
- analysing task complexities such as limitations, freedoms, vulnerabilities, time limitations
- applying a broad range of problem-solving strategies
- communicating effectively with stakeholders
- drafting and releasing complex forms of written communication
- identifying potential solutions to problems or challenges to progress operations
- interpreting instructions and applying this information to actions and tasks
- interpreting policies and procedures
- making informed decisions that align with organisational requirements
- managing own planning tasks in accordance with organisational requirements
- negotiating with stakeholders effectively
- organising the deployment and delivery of logistics support
- undertaking analysis to determine where internal and external factors impact on logistics support requirements
- using appropriate information technology and software.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- deployment methods and sequencing
- environmental considerations for planning logistics support
- logistics analysis principles and processes
- logistics and deployment concepts
- organisation, its function and logistic capabilities
- organisational policy and procedure relevant to logistics
- organisational role relevant to specialist logistic support
- organisational writing conventions

- planning process relevant to deployment and delivery of logistics support
- regulatory standards and requirements for logistics
- relevant agencies and stakeholders
- risks to logistics support
- site considerations.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.
