TLIX0078 Provide specialist materiel logistics advice

Release: 1

TLIX0078 Provide specialist materiel logistics advice

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to provide specialist advice related to materiel logistics in accordance with relevant organisational policy and procedures.

It includes identifying issues, providing advice, formulating options and selecting preferred options to address identified issues.

This unit specifically addresses advice that is relevant to materiel logistics activity; it is not intended to cover technical advice that is provided in a broader context of the organisational endeavour or a professional discipline.

This unit was developed for materiel logistics specialists working within materiel logistics, and may be applicable to individuals in broader logistics roles

Individuals work independently or as part of a team under direct or indirect supervision, use discretion and judgement, and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

X – Logistics

Unit Sector

Not applicable.

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Identify and analyse

1.1

Circumstances that require providing advice

	issues		relating to materiel logistics are observed, received and clarified
		1.2	Issues are identified and confirmed, as required, through consultation with relevant personnel
		1.3	Circumstances are analysed and issues are interpreted and clearly defined
		1.4	Research related to issues is conducted and advice of relevant personnel is sought to clarify unclear findings
2	Formulate options for materiel logistics advice	2.1	Options related to providing advice are identified and evaluated
		2.2	Options are prioritised and preferred options chosen
3	Provide specialist materiel logistics advice	3.1	Advice is formulated and discussed with stakeholders
		3.2	Stakeholder requirements are negotiated, documented and incorporated in proposed advice
		3.3	Reports are developed, presented and disseminated in accordance with organisational policy and procedures
		3.4	Concluding advice is provided in accordance with ethical and practical guidelines in accordance with specified resource constraints

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIX5010 Provide specialist integrated logistics support advice.

This unit replaces but is not equivalent to TLIX5019 Provide specialist materiel sustainment advice.

Assessment Requirements for TLIX0078 Provide specialist materiel logistics advice

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- applying industry knowledge of operations, trends and drivers to provide specialist materiel logistics advice
- approaching negotiations with a clear understanding of key issues and persuasively negotiating to ensure materiel logistics considerations are addressed
- communicating materiel logistics information clearly
- focusing on communicating of materiel logistics advice clearly, presenting information accurately and selecting appropriate medium for communication to influence a range of audiences
- focusing on gaining a clear understanding of others' comments by listening and adapting to audience to ensure materiel logistics considerations are addressed
- identifying, reviewing and analysing information that may impact on the materiel logistics program
- incorporating feedback and analysis of information to overcome challenges or setbacks
- liaising with stakeholders to harness information and opportunities that may impact on materiel logistics program
- preparing and presenting reports that may be complex, to inform and/or to succinctly present an argument to enable results to be achieved
- providing and receiving feedback in a constructive manner.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- analysis process to provide specialist materiel logistics advice
- duty of care as it applies to materiel logistics
- information sources for providing materiel logistics advice
- integrated logistics support
- level of written communication required to prepare letters and reports
- materiel sustainment
- organisational guidelines and standards

- organisational policy and procedures
- own role in relation to wider organisational or project context
- product knowledge related to systems and/or equipment in service in the organisation
- professional codes of practice
- research techniques
- specialist materiel logistics techniques
- verbal communication techniques.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.
