TLIX4008 Conduct integrated logistics support activities

Release: 1

TLIX4008 Conduct integrated logistics support activities

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to conduct integrated logistics support activities.

It includes the requirement to conduct a range of processes including capturing, recording, recovering and analysing data; maintaining associated workplace networks; and stakeholder requirements.

This unit was developed for integrated logistics support specialists working within materiel logistics but is applicable to individuals in broader logistics roles.

Typically these individuals work independently or as part of a team under direct and/or indirect supervision, use discretion and judgement, and take responsibility for the quality of their outputs. All activities are carried out in accordance with relevant organisational policy and procedures.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

X – Logistics

Unit Sector

Not applicable.

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Prepare to conduct

1.1 Stakeholders are identified and consulted on materiel, and

integrated logistics support activities	materiel systems needs and capabilities in accordance with organisational policy and procedures 1.2 Effective relationships are developed with stakeholders through consultation 1.3 Legislation and organisational policy and procedures that may impact on integrated logistics support activities are identified and analysed 1.4 Sources of information relevant to integrated logistics support activities are identified and relevant information is obtained in accordance with organisational policy and procedures 1.5 Personnel involved in integrated logistics support are briefed in accordance with standard procedures
2 Conduct integrated logistics support activities	2.1 Integrated logistics support methods and techniques appropriate to area are employed in accordance with plans, schedules and standard procedures 2.2 Integrated logistics support activities are conducted and concluded within resource constraints 2.3 Integrated logistics support activities are implemented, monitored and amended based on changing circumstances in accordance with methodologies and procedures 2.4 Resources are allocated to integrated logistics support activities in accordance with integrated logistics support plan and resource availability
3 Report on integrated logistics support activities	3.1 Integrated logistics support performance is reported to all stakeholders in a transparent manner in accordance with compliance requirements 3.2 Integrated logistics support activities are regularly reviewed to ensure systems and/or equipment capability is maintained throughout its life cycle, in accordance with organisational policy and procedure
4 Maintain integrated logistics support records	4.1 Integrated logistics support records are completed in accordance with relevant policy and procedures 4.2 Integrated logistics support records are amended and documented in accordance with organisational policy and procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIX4008A Conduct integrated logistics support activities.

Assessment Requirements for TLIX4008 Conduct integrated logistics support activities

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adhering to and applying relevant data and information management processes
- analysing data and information
- applying relevant integrated logistics support and project management knowledge
- applying integrated logistics support knowledge to assist in work and to guide problem solving
- consulting and negotiating with internal and external stakeholders, and resolving potential areas of conflict or concern to ensure overall objectives are achieved
- displaying resilience by continuing to move forward despite criticism or setbacks
- identifying relationships between organisational goals and recognising how own work contributes to achieving these goals
- identifying, reviewing and analysing relevant information that may impact on or be impacted by integrated logistics support activities
- managing time and prioritising work to ensure objectives are met in accordance with required schedule
- undertaking performance measurement to enable objectives to be measured against defined parameters
- using appropriate information technology and software
- using materiel logistics program strategic objectives to identify long-term factors and external considerations for conducting integrated logistics support activities.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- integrated logistics support processes
- level of written communication required to prepare correspondence and reports
- organisational policy and procedures related to integrated logistics support
- organisational role relevant to integrated logistics support
- product knowledge related to systems and/or equipment in service in the organisation
- reliability, availability and maintainability
- safety, legislative and statutory requirements, including relevant environmental and sustainability issues

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- computer and relevant software
- legislation, guidelines, procedures and protocols relating to integrated logistics support
- integrated logistics support plans and associated subordinate plans.
