Assessment Requirements for TLIX4016 Implement and monitor materiel sustainment plans

Release: 1

Assessment Requirements for TLIX4016 Implement and monitor materiel sustainment plans

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- analysing data and information
- applying relevant materiel sustainment and project management knowledge to work and to guide problem solving
- applying relevant implementation processes
- developing and/or complying with procedures to implement and monitor materiel sustainment plans
- displaying resilience by continuing to move forward despite criticism or setbacks, remaining positive and responding to pressure in a controlled manner
- ensuring mechanisms are in place to monitor materiel sustainment plans
- identifying relationships between organisational goals and recognising how own work contributes to achieving these goals
- monitoring and reporting on implementation processes
- negotiating and communicating with key internal and external stakeholders , receiving their input, and resolving potential areas of conflict or concern to ensure overall objectives are achieved
- undertaking performance measurement to enable objectives to be measured against defined parameters
- using organisational strategic objectives to identify long-term factors and external considerations for implementing material sustainment plans.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- codification and cataloguing processes
- configuration management
- contract management
- level of written communication required to prepare correspondence and reports
- logistics support analysis principles and processes
- materiel sustainment processes related to planning
- organisational policy and procedures impacting on materiel sustainment
- organisational role relevant to materiel sustainment
- performance measurement
- product knowledge related to systems and/or equipment in service in the organisation
- safety, legislative and statutory requirements, including environmental and sustainability issues
- technical regulatory framework.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- computer and relevant software
- legislation, guidelines, procedures and protocols relating to materiel sustainment
- materiel sustainment plans and associated subordinate plans.
