TLIX4031 Apply knowledge of configuration management

Release: 1

TLIX4031 Apply knowledge of configuration management

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to analyse and apply knowledge of configuration management in accordance with relevant organisational policy and procedures.

The application of this knowledge is required by people who are not configuration management specialists but who need the knowledge to inform their decision making. The application of configuration management knowledge is specific to a variety of component processes in material logistics activities.

This unit was developed for logistics specialists working within materiel logistics but is applicable to individuals in broader logistics roles.

Typically these individuals work independently or as part of a team under direct and/or indirect supervision, use discretion and judgement, and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

X – Logistics

Unit Sector

Not applicable.
