Assessment Requirements for TLIX4032 Apply knowledge of technical regulatory framework

Release: 1

Assessment Requirements for TLIX4032 Apply knowledge of technical regulatory framework

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adhering to relevant compliance requirements
- applying technical regulatory framework knowledge to work being performed and to guide problem solving
- displaying resilience by continuing to move forward despite criticism or setbacks
- focusing on clear communication of technical regulatory information to a range of audiences
- identifying, interpreting and analysing technical regulatory requirements relevant to work being performed
- presenting technical regulatory information confidently and selecting appropriate medium for communication
- using appropriate information technology and software.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria include knowledge of:

- configuration management
- materiel life cycle
- own role in relation to wider organisational or project context
- safety, legislative and statutory requirements, including relevant environmental and sustainability issues
- technical regulatory framework knowledge relevant to work performed
- technical regulatory framework relevant to materiel and materiel systems.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- computer and relevant software
- legislation, guidelines, procedures and protocols relating to technical regulatory framework
- technical regulatory framework plans.
