Provide specialist integrated logistics  
support advice**

**Release: 1**

# **Assessment Requirements for TLIX5010 Provide specialist integrated logistics support advice**

## **Modification History**

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## **Performance Evidence**

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- displaying insight into how industry operates and drivers that influence industry dealings
- displaying resilience by continuing to move forward despite criticism or setbacks
- explaining key issues and persuasively negotiating to ensure integrated logistics support considerations are addressed
- focusing on clear communication of integrated logistics support information, presenting information confidently and selecting appropriate medium for communication to influence a range of audiences
- focusing on gaining a clear understanding of others' comments by listening and adapting to audience to ensure integrated logistics support considerations are addressed
- identifying, reviewing and analysing information that may impact on integrated logistics support program or may be impacted by integrated logistics support program, including environmental and sustainability issues
- liaising with stakeholders to harness information and opportunities that may impact on integrated logistics support program
- preparing and presenting reports that may be complex and written, to inform and/or to succinctly present an argument to enable results to be achieved
- providing and receiving feedback in a positive manner.

## **Knowledge Evidence**

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- analysis process
- duty of care
- information sources
- integrated logistics support
- level of written communication required to prepare letters and reports
- materiel logistics (materiel sustainment and integrated logistic support)
- organisational guidelines and standards
- organisational policy and procedures
- own role in relation to wider organisational or project context
- product knowledge related to systems and/or equipment in service in the organisation
- professional codes of practice
- research techniques
- verbal communication techniques.

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- computer and relevant software
- legislation, guidelines, procedures and protocols relating to integrated logistic support
- specialist integrated logistics support plans.
