TLIX5043 Conduct maintenance on deployed operations

Release: 1

TLIX5043 Conduct maintenance on deployed operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to organise logistics maintenance support operations in a deployed context in support of operations, in accordance with relevant organisational policy and procedures.

This unit is applicable to logistics personnel responsible for organising and managing delivery of maintenance support in a field deployment context.

The unit will usually be applied in a frontline maintenance facility supporting equipment maintenance, repair and recovery to support organisational operations.

People who undertake this unit will usually be a technician or have an engineering background. This role requires management and leadership skills.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

X – Logistics

Unit Sector

Not applicable.

Elements and Performance Criteria

Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Analyse maintenance

1.1 Maintenance tasks are received and analysed for operational maintenance requirements

requirement

- 1.2 Information is sourced and analysed to identify maintenance factors to be considered in supporting operations
- 1.3 Logistics information management systems are utilised in scheduling and coordinating maintenance
- 1.4 Workshop equipment maintenance is scheduled within constraints of delivering maintenance support
- 1.5 Considerations for production/maintenance planning are applied to derive most efficient employment of maintenance equipment and personnel
- 1.6 Maintenance support enabling components are identified and established
- 1.7 Instructions are prepared and delivered to implement and coordinate maintenance support
- 1.8 Risk analysis is conducted to identify and mitigate against unacceptable risks
- 1.9 Technical advice is provided to management and stakeholders

2 Manage maintenance support

- 2.1 Maintenance technical policy and procedure are applied when conducting maintenance support
- 2.2 Work health and safety (WHS)/occupational health and safety (OHS) requirements and recognised safety precautions are applied throughout operation in accordance with standard procedures
- 2.3 Maintenance personnel are supervised, and efficiently and effectively employed within their area of speciality
- 2.4 Repair/recovery support requests are received and appropriate response is developed to support task
- 2.5 Maintenance effort is monitored to ensure workload is effectively distributed across maintenance organisation
- 2.6 Operational or organisational constraints are recognised and maintenance tasks are directed to align with these constraints
- 2.7 Maintenance activity is monitored to ensure maintenance organisations are conducting activity with appropriate authority and in accordance with organisational policy and procedures
- 2.8 Liaison with agencies involved in operation, maintenance and supply chain is carried out to ensure most effective coordination

of effort

2.9 Maintenance support priorities are set to align maintenance support activities with organisational objectives

2.10 Management and stakeholders are advised when significant issues or developments arise that may adversely impact on technical integrity of material within the organisation

2.11 Maintenance records are maintained and entered into information systems

3 Forecast repair parts requirements

3.1 Repair parts agencies are liaised with to coordinate provisioning of repair parts to meet forecast maintenance requirements

3.2 Supply and demand of repair parts is monitored to ensure repair parts and materials are available to support maintenance activities

3.3 Management of repair parts records are monitored to ensure visibility over repair parts to support maintenance planning

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIX5043A Conduct maintenance on deployed operations.
