Assessment Requirements for TLIX5053 Determine tariff classification for complex goods

Release: 1

Assessment Requirements for TLIX5053 Determine tariff classification for complex goods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- carrying out advanced calculations
- communicating effectively with clients
- completing post classification requirements
- following designated process for classifying goods
- gathering and analysing information
- identifying, interpreting and applying interpretive rules (IRs) to the tariff to goods
- identifying, interpreting and learning new skills and knowledge to maintain currency when classifying complex goods
- locating and justifying a sub-heading (6 or 8 figure)
- locating, reading and interpreting instructions, procedures and other information relevant to classifying complex goods
- maintaining workplace documentation and records
- planning and organising work activities when classifying complex goods
- reading and interpreting relevant legislation for classifying complex goods
- selecting and using appropriate technical terms
- selecting and using relevant communication methods and office equipment suitable for the task
- selecting and justifying tariff headings (4 figure)
- selecting tariff headings to classify complex goods
- sequencing activity in a way that facilitates the classification of complex goods
- solving problems that may arise when classifying complex goods such as textiles and metals
- using relevant software application systems when classifying complex goods
- working systematically with required attention to detail.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- current Australian Customs Act and relevant legislation
- dash system
- documentation and recording requirements to comply with customs requirements when classifying complex goods
- information on the process of classifying complex goods for importing and exporting goods through customs
- interpretive rules
- options available for resolving disputes
- procedural steps required to undertake work activities
- relevant information to provide to clients
- sources of information on current developments when classifying complex goods for the import and export of goods through customs (Administrative Appeals Tribunal [AAT] cases, court cases)
- strategies to classify:
 - functional units
 - multifunction machines
 - parts and accessories
- strategies to implement new developments in classifying complex goods
- tariff advice
- types of goods considered complex, and related classification and documentation requirements.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so. Where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.
