Assessment Requirements for TLIX6048 Manage the deployment and delivery of logistics support

Release: 1

Assessment Requirements for TLIX6048 Manage the deployment and delivery of logistics support

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- analysing task complexities
- applying a broad range of problem-solving strategies to planning outcomes
- controlling risk when planning and executing integrated logistic support
- identifying operational intent and recognising how own planning contributes to operational success
- interpreting instructions and applying this information to developing actions and tasks
- interpreting policy and procedures
- liaising with internal and external organisations and representatives to plan and accomplish tasks
- making informed decisions that align with organisational requirements
- managing own planning tasks
- moving forward despite task difficulty
- undertaking analysis to determine where internal and external factors impact on health support requirements, and adjusting planning accordingly
- using appropriate information technology and software
- working cooperatively as a member of a team.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- channels of communication and processes for obtaining advice, approvals
- environmental considerations in logistics support
- equal employment opportunity, equity and diversity principles
- functional and technical siting requirements of specialist logistics teams
- likely logistics needs of deployed dependencies
- legislation, regulations, and guidelines relating to deployment logistic support
- logistics concepts including a knowledge of mobilisation, deployment, reception, staging, onward movement, integration, sustainment, redeployment and reconstitution
- organisation, its function and logistics capabilities
- organisational policy and procedure
- organisational writing conventions
- planning process
- specialist logistics support services including transport, material maintenance, supply, catering and health support.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.
