Assessment Requirements for TLIX6050 Plan distribution operations on deployment

Release: 1

Assessment Requirements for TLIX6050 Plan distribution operations on deployment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- analysing and validating numerical information accurately
- analysing task complexities
- applying a broad range of problem-solving strategies to planning outcomes
- communicating complex ideas and arguments in a persuasive manner
- identifying operational intent and recognising how own planning contributes to mission success
- interpreting instructions and applying this to developing own actions and tasks
- interpreting technical policy and doctrine
- making informed decisions that align with organisational requirements
- managing planning tasks in collaboration with other stakeholders
- moving forward despite planning task difficulty
- preparing and issuing written instructions
- reading and writing at a level to cope with a range of complex workplace materials
- undertaking analysis to determine where internal and external factors impact on logistics requirements
- using appropriate information technology and software
- using planning tools
- working cooperatively as a member of a team.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- environmental considerations for planning logistics support
- legislative and regulatory environment as it pertains to distribution and logistic support
- logistics support concepts
- logistics support concepts including mobilisation, deployment, reception, staging, onward movement, integration, sustainment, redeployment and reconstitution
- organisational structures and support services
- techniques to deal with opposing views and to negotiate a consensus position
- transport logistics including stock distribution and transportation strategies.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.
