

**Australian Government**

# **TLILIC2016B Licence to drive a heavy rigid vehicle**

**Release 1**

# **TLILIC2016B Licence to drive a heavy rigid vehicle**

## **Modification History**

New release. This unit replaces and is equivalent to TLILIC2016A.

## **Unit Descriptor**

This unit involves the skills and knowledge required to obtain a licence to drive a heavy rigid vehicle. It includes systematically and efficiently controlling all vehicle functions, monitoring traffic and road conditions, managing vehicle condition and performance, and effectively managing hazardous situations.

Assessment of this unit will be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory driver licensing authority.

## **Application of the Unit**

This unit applies to driving that is carried out in compliance with the licence requirements and regulations of the relevant state/territory driver licensing authority pertaining to heavy rigid vehicles.

Driving is performed with limited or minimum supervision, and with limited accountability and responsibility for self and others in achieving the prescribed outcomes.

Driving involves the application of routine vehicle driving principles and procedures to maintain safety and operate a heavy rigid vehicle across a variety of driving contexts.

The primary legislative requirements applicable to this unit of competency are state/territory legislation in relation to road use and driver licensing.

This unit addresses the knowledge and skills necessary for the granting of a Heavy Rigid Driver Licence.

Being awarded this unit of competency is a necessary requirement to obtain a Heavy Rigid Driver Licence but is only one of several criteria. Prospective licence applicants should check with the state/territory driver licensing authority for other criteria (such as licence tenure and medical fitness) to confirm compliance with other eligibility requirements before undertaking training and/or assessment.

## **Licensing/Regulatory Information**

Not applicable.

## **Pre-Requisites**

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

- |                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

| <b>3 Monitor and maintain vehicle performance</b> | <ul style="list-style-type: none"><li>3.1 Vehicle performance is maintained through pre-operational inspections and vehicle checks</li><li>3.2 Appropriate signage, lights and equipment are checked for operational effectiveness and for conformity to prescribed traffic regulations</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

## Required Skills and Knowledge

This section describes the knowledge and skills required for this unit.

### Required knowledge:

- Driving hazards and related defensive driving techniques
- Efficient driving techniques
- Engine power management and safe driving strategies
- Heavy rigid vehicle controls, instruments and indicators and their use
- Heavy rigid vehicle handling procedures
- Pre-operational checks carried out on vehicle and related action
- Relevant state/territory driver licensing authority road rules, regulations, permit and licence requirements

### Required skills:

- Anticipate and monitor and traffic hazards and take appropriate action
- Apply precautions and required action to eliminate, minimise or control hazards that may exist when driving a heavy rigid vehicle
- Carry out pre-operational vehicle checks
- Communicate effectively with others when driving a heavy rigid vehicle
- Read and interpret instructions, procedures, information and signs relevant to driving a heavy rigid vehicle

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the Elements, Performance Criteria, Required Skills, Required Knowledge and include:

- applying relevant procedures that reflect legislative requirements
- negotiating a range of complex traffic infrastructure (such as roundabouts, traffic lights, stalemate intersections, railway level crossings).

### **Context of and specific resources for assessment**

Resources for assessment include access to:

- range of relevant exercises, case studies and/or other simulated practical and knowledge assessment
- appropriate range of relevant on-road operational situations or in the workplace
- relevant and appropriate materials and equipment
- applicable documentation such as workplace procedures, regulations, codes of practice and operation manuals.

### **Method of assessment**

Practical driving aspects must be assessed in a vehicle typical of the class as approved by the state/territory driver licensing authority. The use of simulators for driver testing is not permitted.

The assessor must use the mandatory assessment tool provided by the state/territory driver licensing authority to conduct the assessment for this unit according to licensing authority requirements.

The state/territory driver licensing authority may prescribe approved routes, which must be used for the final assessment.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- Heavy rigid vehicle includes:
- Rigid vehicle, not being an unladen prime mover, with a minimum of three axles and a minimum 15 tonnes GVM
  - Modified three axle prime mover with a certified detachable tray (with capacity to carry 75% of its specified GVM) with a GVM of 15 tonnes
  - Three axle articulated bus
  - Three axle bus above 15 tonnes GVM
- Vehicle handling procedures may include:
- Accelerating and braking
  - Managing engine performance
  - Operating vehicle controls, instruments and indicators
  - Positioning and stopping a vehicle
  - Reversing a vehicle
  - Starting a vehicle
  - Steering and manoeuvring a vehicle
  - Using defensive driving techniques
- Driving hazards may include:
- Animals and objects on road
  - Faulty:
    - brakes
    - steering mechanism on vehicle
  - Fire in vehicle
  - Flooded sections of road
  - Foggy conditions
  - Leaking fuel
  - Oil on road
  - Parked vehicles on road
  - Pedestrians crossing road
  - Wet and iced roads
  - Windy sections of road
- Traffic and road conditions may include:
- Negotiating a range of more complex traffic infrastructure (such as roundabouts, traffic lights, stalemate intersections, railway level crossings)
  - On open or private roads including roads with moderate inclines and declines
  - Operations conducted during the day or night
  - Typical weather conditions
  - While at a depot, base or warehouse
  - While at a client workplace or worksite
- Pre-operational inspections
- Checking and topping up fluid levels

and equipment checks may include:

- Checking:
  - brakes
  - operation of vehicle lights and indicators
  - tyre pressures
- Visually checking vehicle
