TLISS00006 Control Rail Traffic Through Worksite Skill Set

Release 3

TLISS00006 Control Rail Traffic Through Worksite Skill Set

Modification History

Release 3

This is the third release of this skill set in TLI10 Transport and Logistics Training Package Version 3.0.

Units revised. Equivalent to previous version of the skill set.

Description

This skill set targets anyone required to control rail traffic through a worksite as part of their job role as a protection officer; it is not aligned to any specific qualification and can be achieved separately.

Pathways Information

Licensing/Regulatory Information

Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

Skill Set Requirements

A total of **3 units** of competency must be completed.

Unit/s	
TLIF2080C	Safely access the rail corridor
TLIF3083B	Conduct track protection assessment
TLIL3083A	Implement a track work authority and manage rail traffic through worksites

Target Group

This is a skill set used in the role of Protection Officer within the general rail infrastructure environment. It can also be used by anyone required to control rail traffic through a worksite.

Suggested words for Statement of Attainment

These competencies from the TLI10 Transport and Logistics Training Package (Version 3) meet the needs of protection officer duties. The competencies are drawn from a nationally endorsed Training Package, and provide the skills and knowledge for a person working as a protection officer operating within the general rail infrastructure environment.
