Description

Not Applicable

Pathways Information

This skill set targets anyone who is required to install mechanical signalling and/or locking and interlocking equipment within a rail environment. It is not aligned to any specific qualification and can be achieved separately however is expected that the person requiring this skill set would also work on electrical signalling equipment as their major activity.

Licensing/Regulatory Information

Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

Skill Set Requirements

A total of **1 unit** of competency must be completed.

Unit/s	
TLIS3009A	Install mechanical signalling locking and interlocking devices

Target Group

This is a skill set used by persons required to install mechanical equipment within a rail infrastructure environment. It is intended for operations on equipment used in mechanical signalling, locking and interlocking.

Suggested words for Statement of Attainment

This competency from the TLI10 Transport and Logistics Training Package (Version 2) meets the needs to install mechanical equipment. The competency is drawn from a nationally endorsed Training Package, and provides the skills and knowledge for a person installing mechanical signalling and/or locking and interlocking equipment within the general rail infrastructure environment.
