Assessment Requirements for UEECD0018 Establish, maintain and evaluate energy sector WHS/OHS systems

Release: 1

Assessment Requirements for UEECD0018 Establish, maintain and evaluate energy sector WHS/OHS systems

Modification History

Release 1. This is the first release of this unit of competency in the UEE Electrotechnology Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- establishing and maintaining the framework for the work health and safety (WHS)/occupational health and safety (OHS) system
- establishing and maintaining participative arrangements for management of WHS/OHS
- establishing and maintaining procedures for identifying hazards, assessing risk and controlling risk
- establishing and maintaining procedures for dealing with hazardous events
- establishing and maintaining WHS/OHS training programs
- establish and maintaining a system for WHS/OHS records
- evaluating the WHS/OHS system and related policies, procedures and programs
- dealing with unplanned events
- addressing and resolving issues raised through participation and consultation
- addressing risk assessment and control at planning, design and evaluation stages of any change
- developing and implementing control measures to assess risks in hierarchy of control
- developing and integrating workplace procedures for ongoing assessment of risk
- identifying inadequacies in risk control measures
- implementing interim and ongoing control measures for identified risk immediately
- monitoring activities to ensure workplace procedure is implemented
- providing outcomes of participation and consultation to employees.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- energy sector WHS/OHS enterprise responsibilities, including:
 - provisions of relevant WHS/OHS legislation
 - principles and practice of effective WHS/OHS management
 - management arrangements relating to regulatory compliance

- enterprise hazards and risks, control measures and relevant expertise required
- characteristics and composition of workforce and their impact on WHS/OHS
- relevance of enterprise management systems to WHS/OHS
- analysis of working environment and design of appropriate WHS/OHS systems
- analysis of relevant data and evaluation of WHS/OHS system effectiveness
- assess resources to establish and maintain WHS/OHS management systems
- relevant manufacturer specifications and operating instructions
- relevant safe work method statements (SWMS)/job safety assessments or risk mitigation processes
- relevant workplace documentation
- relevant workplace policies and procedures.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in suitable workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated suitable workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, facilities and equipment currently used in industry
- resources that reflect current industry practices in relation to establishing, maintaining and evaluating WHS/OHS systems
- applicable documentation, including workplace procedures, equipment specifications, regulations, codes of practice and operation manuals.
