Assessment Requirements for UEECO0007 Participate in electronics and communications work and competency development activities

Modification History

Release 1. This is the first release of this unit of competency in the UEE Electrotechnology Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least two separate occasions and include:

- complying with relevant electronics and communications industry standards and workplace procedures
- dealing with unplanned situations in accordance with relevant industry standards and workplace procedures and approval of relevant person/s
- identifying and confirming relevant industry standards and workplace procedures
- identifying and confirming the context, requirements and responsibilities of the competency development plan
- identifying and confirming the relevant training organisations
- monitoring and responding to a personal competency development plan
- periodically reviewing progress of the competency development activities
- reporting periodically competency development activities
- seeking assistance to assist in developing competency
- seeking clarification of how work is to be carried out in accordance with workplace procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- enterprise work activities policies and procedures
- methods of monitoring and reporting competency development activities
- relevant industry bodies, customs and practices
- relevant manufacturer specifications
- relevant training organisations
- relevant work health and safety (WHS)/occupational health and safety (OHS) legislated requirements
- relevant workplace documentation

- relevant workplace policies and procedures
- responsibilities under a competency development plan.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in suitable workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated suitable workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, facilities and equipment currently used in industry
- resources that reflect current industry practices in relation to participating in development and following a personal competency development plan
- applicable documentation, including workplace procedures, equipment specifications, regulations, codes of practice and operation manuals.
