Assessment Requirements for UEECS0016 Develop energy sector directory services

Release: 1

Assessment Requirements for UEECS0016 Develop energy sector directory services

Modification History

Release 1. This is the first release of this unit of competency in the UEE Electrotechnology Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least two separate occasions and include:

- applying relevant work health and safety (WHS)/occupational health and safety (OHS) requirements, including:
 - using risk control measures
- configuring directory services components
- dealing with unplanned events in accordance with workplace procedures and safe work practices
- documenting directory services development activities
- installing and configuring a directory services infrastructure
- installing, configuring and managing energy sector directory services
- preparing to develop energy sector directory services
- testing and maintaining directory services.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- configuring directory service roles and services
- configuring the directory services infrastructure
- creating and maintaining directory service objects
- maintaining the directory services environment
- relevant manufacturer specifications
- relevant job safety assessments or risk mitigation processes
- relevant tools and software
- relevant WHS/OHS legislated requirements
- relevant workplace documentation
- relevant workplace policies and procedures.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in suitable workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated suitable workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, facilities and equipment currently used in industry
- resources that reflect current industry practices in relation to developing energy sector directory services
- applicable documentation, including workplace procedures, equipment specifications, regulations, codes of practice and operation manuals.
