Assessment Requirements for UEEDV0009

Select and arrange data and voice equipment for local area networks

Release: 1

Assessment Requirements for UEEDV0009 Select and arrange data and voice equipment for local area networks

Modification History

Release 1. This is the first release of this unit of competency in the UEE Electrotechnology Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions on at least two separate occasions and include:

- applying relevant work health and safety (WHS)/occupational health and safety (WHS/OHS) requirements, including using risk control measures
- arranging earthing in accordance with job specifications and relevant industry standards
- arranging locations of equipment and cable routes
- arranging network equipment
- documenting communications network
- documenting installation arrangements and specifications for items selected and reasons for the selections made
- documenting justifications for selections of cable and electronic equipment
- planning cable routes in accordance with job specifications and relevant industry standards
- preparing to select equipment
- selecting appropriate earthing components
- selecting cables and equipment
- selecting electronic equipment types
- selecting types and sizes of cables.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include knowledge of:

- local area network (LAN) fundamentals
- performance of copper or fibre installation and termination
- customer switching system (CSS) customer access equipment (CAE)
- relevant manufacturer specifications
- relevant job safety assessments or risk mitigation processes
- relevant WHS/OHS legislated requirements
- relevant workplace documentation

- relevant workplace policies and procedures
- switches, hubs and routers.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in suitable workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated suitable workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, facilities and equipment currently used in industry
- resources that reflect current industry practices in relation to selecting and arranging equipment for LANs
- applicable documentation, including workplace procedures, equipment specifications, regulations, codes of practice and operation manuals.
