Assessment Requirements for UEEEC0002 Assemble and install reception antennae and signal distribution equipment

Release: 1

Assessment Requirements for UEEEC0002 Assemble and install reception antennae and signal distribution equipment

Modification History

Release 1. This is the first release of this unit of competency in the UEE Electrotechnology Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions on at least two separate occasions and include:

- accurately placing and securing antennae and accessories
- adjusting for optimum reception at each outlet
- applying relevant risk identification, assessment, reporting and control requirements
- applying relevant work health and safety (WHS)/occupational health and safety (OHS) requirements, including the use of risk control measures
- applying sustainable energy principles and practices
- coordinating work with relevant person/s
- correctly terminating cable and conductors
- dealing effectively with unplanned events
- identifying and accessing materials, tools, apparatus and testing devices
- isolating circuits/machines/systems
- reading and interpreting drawings of circuit arrangements and component locations.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include knowledge of:

- antenna assembly and installation, including:
 - antenna distribution systems
 - antenna testing, fault finding and repair
 - relevant standards, codes and regulations
 - satellite receivers
 - signal reception
 - transmission line types and characteristics
 - TV antenna types, operating characteristics and terminology
- relevant manufacturer specifications

- relevant safe work method statements (SWMS)/job safety assessments or risk mitigation processes
- relevant WHS/OHS legislated requirements
- relevant workplace documentation
- relevant workplace policies and procedures.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in suitable workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in suitable simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- resources that reflect current industry practices in relation to assembling and erecting reception antennae and signal distribution equipment
- applicable documentation, including workplace procedures, equipment specifications, regulations, codes of practice and operation manuals.
